Abstract: In this article, a comprehensive manual was developed that describes the moral foundations of cognitive-motivational competence, models, principles, technologies, stages of formation and results of its development in students of pre-conscript military education.

Key words : competence , development strategy , global security , cognitive-motivational competence

In today's military education, improvement of the system of motivational-cognitive competence development of students of military education before the draft is evaluated as one of the urgent tasks. In recent years, special attention has been paid to military training, improving its quality and efficiency. The content of military education has been improved before the draft, and State educational standards have been developed that allow to fully cover its essence. At the same time, attention was paid to the formation of certain spiritual and moral qualities in young people, including students, along with providing them with military education before being called up.

In the new development strategy of Uzbekistan, on the basis of comprehensive work aimed at protecting the homeland with loyalty, developing feelings of self-sacrifice, forming loyalty to the homeland and responsibility in the society, improving the physical skills of students in the education system, especially in military education, educational goals focused on increasing fighting spirit, developing tactical knowledge and capabilities are also provided. In this sense, it is one of the important tasks to bring the students of military education to a new qualitative level of training in the higher education system and to study the essence of increasing the efficiency of personnel training, to eliminate the existing shortcomings. At the new stage of development of our society, it is extremely important to develop the spirit of patriotism in the youth of the society, to accelerate the pace of cultural, spiritual and moral development, to rationally implement educational activities, and to carry out educational activities regularly. . If a person right _ education if he doesn't find it , his activity society for will be harmful . President Shaukat Mirziyoyev this about the following those who expressed their opinions : " Uz in their children high patriotism the soul maturity could not find state , how powerful to the gun have be it , defense strengthen the ability can not » \ . Therefore, military education before the call-up is one of the urgent tasks of developing a fighting position based on a sense of patriotism, strengthening physical maturity, improving cognitive activity and motivation in students. For this, it is necessary to improve the quality of education in the pedagogical process, to analyze the content of the factors affecting its effectiveness.

The head of our state, Sh.M. Mirziyoyev, in his holiday greetings to the defenders of the homeland on the occasion of the 25th anniversary of the establishment of THE ARMED FORCES OF THE Republic of Uzbekistan , SAID THAT the military and political situation in the world and in our region has changed dramatically, and the dangers and threats in the field of national and global security are increasing. , paid special attention to the need to continue well-thought-out and consistent actions on the further development and improvement of our national army in such a highly responsible situation. In particular, the urgent importance of continuous education and training aimed at increasing the motivational and cognitive training of military personnel , as well as the improvement of the professional military personnel training system at all levels, the further development of our national army, the general culture of the trained military personnel, their

recreation to create all the favorable conditions for them to learn and play sports, and in this process, to identify young people who are really worthy of education in a military educational institution, who have high intelligence and leadership skills, it is necessary to increase the demand for selecting them to study attention was drawn. After all, "if we don't take care of our children ourselves, if we don't take care of them, if we don't educate them ourselves, someone from abroad will not do it for us. For this reason, every officer should consider it as important a duty as military service to return the lost youth to the right path using effective forms and methods. Therefore, every pedagogue working in the field of education and responsible training leaders should improve their military readiness by developing cognitive-motivational skills in military education students, as well as their minds and hearts. , mother - it should be considered as an important task to deeply inculcate the ideas of love for the motherland and loyalty to the country. Human qualities such as selflessness, bravery, loyalty, and kindness develop a fighting spirit in the students of military education until the draft. For this, we need to focus more on "education of teachers of the new era, development of pedagogical science, innovative educational technologies, creative approaches" and bring their development to a new level.
