

FORMATION OF PEDAGOGICAL COMPETENCE OF FUTURE PRIMARY CLASS TEACHERS

Dehqonova Mahliyo Shuhrat qizi

Teacher of FSU

ABSTRACT: The article is the result of a theoretical and practical study of the role of pedagogical practice in the formation of the foundations of pedagogical competence of students who are being trained as future elementary school teachers in the higher education system.

Key words and phrases: Future primary school teacher, student, pedagogical competence, pedagogical practice, competitive specialist.

Current fast in paces developing education in the field especially modern _ High education of graduates wide comprehensive professional competencies formation task own _ forward is putting and our country higher study countries modern work in the market on demand have has been competitive experts from preparation interested . University graduates - own _ of the field future specialists reading during not only professional in the field himself successful done increase for necessary has been knowledge , skill and qualifications possessions , perhaps new professional important have qualities development and more this about own on their performance need _ This to the goal reach for pedagogical of means whole complex , that's it including trained ones _ by qualification requirements suitable coming qualities absorbable students in teaching is used . Future _ initial class teachers to the profession of preparation such system organize reach professional competence , that is in students pedagogical competence to form help gives _

Research materials and methodology . To the students education to give in the process pedagogy universities in students professional competence forming , they by own _ opportunities have been achieved to the degree according to done increased occupation to choose done increase for necessary conditions to create separately importance will give and their preparation and personal motivation attention to increase is directed . Of these all of them modern higher of education pedagogical competence the basics formation of the issue relevance checks . In progress abilities such the system organize reach future _ teachers , professional competence to form contribution adds _ Pedagogical practice in the process this pedagogy higher study _ countries students in the middle pedagogical competence formation , their own abilities , achieved preparation level and personal to motivation according to profession conscious respectively choose for necessary conditions to create especially as a matter of urgency to look it is necessary Of these all of them modern higher in education professional competence the basics formation of the issue from relevance proof will give it is an exaggeration it won't be . Modern in the circumstances natural and active thinking , learning _ process modeller , education and education new ideas and technologies independent thinking to find life application doer future initial class of the teacher professional qualification level increase issue current being left _ First , professional qualified teacher _ educational the work in the process of students creative abilities to form positive effect shows ; secondly , professional in the activity the most good to the results achieves ; thirdly , he has his professional potential how done increase knows _ The same at the time education environment conditions new that's it , education the content of teaching form and methods changed is going , knowledge to quality increased demand _ going on , study structure is getting complicated - these all of them study in the process more complexity requires an increase . Pedagogical competence and future future _ initial class of the teacher professional activity done to increase readiness formation issue the same that's it aspects because of more relevance proof does _

Research results . The teacher's pedagogical qualification is this experience , theory knowledge , practical skills and important personal qualities to combine based on complex individual psychological education means _ Competencies take over for student this conscious of activity to the

subject rotation necessary _ Competence him done increase to himself special from the conditions separate it won't be . He is one of time in himself known one activity to the conditions customized knowledge , skill and behavior relationships mobile to do connects _ Which one in a sense this perfection sign is also In this perfect to be means and : obtained knowledge and the experience certain in the situation mobile to do ability said sentences with equal to So so , professional competence to study dedicated wide scope studies , his development features this of the problem modern pedagogy science and practice for important that and researchers interested shows . Certain competencies formation for they are himself _ manifestation who does belongs to conditions necessary _ Competence start drinking from the degree starting from develops , enriches , expands or is strengthened . With that together , pedagogical professional skill , individual style , individual activity style with individual characteristics himself _ understand high level with depends .

Discussion . Get started class teacher of work to himself special feature a lot subjectivity . From teachers of other subjects different as , he is Russian language , literary reading , mathematics , visual art , music , technology , surroundings the world and another study sciences teaching mastering the methods need _ Of these all of them start drinking class of the teacher practical training , his individual creativity abilities to form serious attention It requires giving _ _ to him different different kind of modern study in institutions small age students with , that is initial class teachers education activities successful take to go enable gives _ Future _ initial class teachers professional in preparation pedagogical practice separately place holds _ It will happen of experts theoretical and practical preparation between dependence , their education quality increase the most important is a condition because practice future professional to the activity possibility until near in the circumstances done is increased , in which professional qualification formation process done is increased . Because of this future _ initial class of teachers qualification successful is being strengthened . Also pedagogical _ practice « pedagogical of the "university - school " system important the neck being , it is one from the side future of teachers professional and pedagogical readiness in increasing , one from the side teaching and bring up quality in raising their organic mutually cooperation for big to opportunities have _ Get started in classes pedagogical practice system future initial class of teachers professional and pedagogical readiness enough high level providing his own to the goal compatibility reliable way shows . This of the system in the structure their own sure the goal and duties solution who does " Primary" of republican education » specialty according to state higher education standards with determined different different pedagogical practice types separate stands , in particular : - of the child at school the first days ; - from the class except educational things organize reach _ - educational and pedagogical practice ; - general practice _

Conclusion . Pedagogical of practice this types form and content in terms of to himself special properties have and him organize of reaching main principles according to done is increased : the practice life with link , content and organize of reaching modern school requirements compliance , its content and from the course to the course organize reach methods systematicity , continuity , complexity ; theoretical courses with relatedness ; at school of students study and from class except educational of work unity providing , practice content consistency in them step by step to develop directed of students activity types change and to complicate which provides complicated is a feature . Most simple pedagogical technique and of actions the beginning , later they are more it gets complicated and more complicated study _ skill will be combined , this while own name with integration is called So so , small from the age starting from small age of students behavior and activities observation and analysis make , their education diagnosis put , age children individual characteristics of development account get such as pedagogical qualities formation will be planned . Future _ initial class teachers with students teaching and bring up in the process , educational things planning and done increase ability , general by doing in other words , pedagogical competencies

formation is _ finally As a result generalized pedagogical ability - small age students with educational things take to go ability forms .
